DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Uz et al (5,847,761) for the same reasons as set forth in Section 3 of the last office action, dated 2/17/06.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2621

5. Claims 1-16 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Ishiyama (2001/0008544) in view of Reininger et al (5,426,463) for the same reasons as set forth in Section 9 of the previous office action, dated 7/20/04.

Since applicant has canceled the limitations from the previous amendment, the old rejection on claims 1-16 would be applicable again.

Response to Arguments

6. Applicant's arguments filed 5/15/06 have been fully considered but they are not persuasive. Applicant asserts on pages 7 and 10 of the Remarks that claims 22-24 are added. However, page 6 of the response contains only claims 20 and 21.

Applicant asserts on page 7 of the Remarks that the OA provides little commentary directed to claim 17. However, it is noted claim 17 is the corresponding system claim to the method claim 1. Since each and every element was addressed in the corresponding method claim 1, one of ordinary skill in the art would have had no difficulty in understanding the corresponding elements in claim 17 are similarly met. For example, Uz et al discloses an encoder 80 to perform the encoding step of claim 1; a management module 10 to perform the monitoring and adjusting steps of claim 1 by storing data blocks in an input buffer 50 and cause to encode the data blocks.

Applicant also asserts on page 7 of the Remarks that Uz et al does not seem to have a buffer 302. Examiner agrees. However, element 302 indicates monitoring the fullness level of the buffer, not the buffer itself.

Applicant asserts on page 8 of the Remarks that the VBV buffer fullness monitoring of Uz et al is at the decoder rather than the encoder. However, it is noted

Figures 7B and 7C illustrate the concept of such VBV buffer fullness monitoring in an encoder setup as illustrated in Figure 7A.

7. In response to applicant's argument on pages 8-9 of the Remarks that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the encoder's input buffer) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
